Information Roadmap

Version 1  Release 13
Information Roadmap

Version 1  Release 13
Fourteenth Edition, September 2011

This is a major revision of SA22-7500-13.

This edition applies to Version 1 Release 13 of z/OS (5694-A01), and to all subsequent releases and modifications until otherwise indicated in new editions.

About this document

z/OS® is an advanced-technology, highly secure, scalable, high-performance enterprise operating system on which to build and deploy Internet and Java-enabled applications, providing a comprehensive and diverse application execution environment.

This document supports z/OS (5694-A01); it describes the information for the base elements and optional features included in z/OS.

How to use this document

For an explanation of how to obtain and use z/OS documents, see [Chapter 1, "Accessing, viewing, and printing z/OS documentation," on page 1], which describes the information available with z/OS.

For descriptions of the documents associated with z/OS elements and features, see [Chapter 2, "z/OS document descriptions," on page 9]. The document descriptions can help you become familiar with the information included with z/OS and how it is organized.

For a list of the titles and order numbers of the z/OS documents, see [Table 1 on page 51].
How to send your comments to IBM

We appreciate your input on this publication. Feel free to comment on the clarity, accuracy, and completeness of the information or give us any other feedback that you might have.

Use one of the following methods to send us your comments:
1. Send an email to mhvrdfs@us.ibm.com
3. Mail the comments to the following address:
   IBM Corporation
   Attention: MHVRCFS Reader Comments
   Department H6MA, Building 707
   2455 South Road
   Poughkeepsie, NY 12601-5400
   U.S.A.
4. Fax the comments to us as follows:
   From the United States and Canada: 1+845+432-9405
   From all other countries: Your international access code +1+845+432-9405

Include the following information:
• Your name and address
• Your email address
• Your telephone or fax number
• The publication title and order number:
  =e0zn100s;
  &e0zn100n;=&e0zn100d;
• The topic and page number related to your comment
• The text of your comment.

When you send comments to IBM, you grant IBM a nonexclusive right to use or distribute your comments in any way it believes appropriate without incurring any obligation to you.

IBM or any other organizations will only use the personal information that you supply to contact you about the issues that you submit.

If you have a technical problem

Do not use the feedback methods listed above. Instead, do one of the following:
• Contact your IBM service representative
• Call IBM technical support
• Visit the IBM support portal at http://www.ibm.com/systems/z/support/
Summary of changes

This section lists technical changes made to this document for the current and previous two releases of z/OS.

Changes made in z/OS Version 1 Release 13

This document contains information that was previously presented in z/OS Information Roadmap, SA22-7500-13, which supports z/OS Version 1 Release 12.

New information:

A new book was added to the MVS library:

• z/OS Batch Runtime Planning and User's Guide, SA23-2270

Deleted information:

Starting in R13, Distributed Computing Environment (DCE) and Distributed Computing Environment Security Server (DCE Security Server) will no longer be shipped with z/OS; therefore, the following books have been deleted:

• z/OS DCE Administration Guide, SC24-5904
• z/OS DCE Application Development Guide: Core Components, SC24-5905
• z/OS DCE Application Development Guide: Directory Services, SC24-5906
• z/OS DCE Application Development Guide: Introduction and Style, SC24-5907
• z/OS DCE Application Development Reference, SC24-5908
• z/OS DCE Command Reference, SC24-5909
• z/OS DCE Configuring and Getting Started, SC24-5910
• z/OS DCE Introduction, SC24-5911
• z/OS DCE Messages and Codes, SC24-5912
• z/OS DCE Planning, SC24-5913
• z/OS DCE User's Guide, SC24-5914

z/OS Distributed File Service Customization, SC24-5916, and z/OS Distributed File Service Administration, SC24-5915, are being deleted from the DFS library. They contained a high proportion of information about DCE, which is a product no longer supported by IBM. The remaining information from these books will be moved to z/OS Distributed File Service SMB Administration and z/OS Distributed File Service zFS Administration.

Changes made in z/OS Version 1 Release 12

This document contains information that was previously presented in z/OS Information Roadmap, SA22-7500-12, which supports z/OS Version 1 Release 11.

New information

The "Readers' Comments - We'd Like to Hear from You" section at the back of this publication has been replaced with a new "How to send your comments to IBM" section at the front of this publication, located between the "About this document"
and "Summary of changes" sections. The hardcopy mail-in form has been replaced with a page that provides information appropriate for submitting readers comments to IBM.

A new book has been added to support the new product, IBM z/OS Management Facility:
• IBM z/OS Management Facility Configuration Guide, SA38-0652.

A new book has been added to the IBM Tivoli Directory Server library:
• IBM Tivoli Directory Server Messages and Codes for z/OS, SA23-2262.

**Changed information**

z/OS Support for Unicode: Using Unicode Services has been retitled to z/OS Unicode Services User's Guide and Reference.

**Deleted information**

The MVS, JES2, and JES3 Data Area books are not formally available (no document numbers) from the collection kit or from the respective libraries. Instead, they are only available by searching on the z/OS Library Web site.
• z/OS V1R12.0 MVS Data Areas, Vol 1
• z/OS V1R12.0 MVS Data Areas, Vol 2
• z/OS V1R12.0 MVS Data Areas, Vol 3
• z/OS V1R12.0 MVS Data Areas, Vol 4
• z/OS V1R12.0 MVS Data Areas, Vol 5
• z/OS V1R12.0 MVS Data Areas, Vol 6
• z/OS V1R12.0 JES2 Data Areas, Vol 1
• z/OS V1R12.0 JES2 Data Areas, Vol 2
• z/OS V1R12.0 JES2 Data Areas, Vol 3
• z/OS V1R12.0 JES2 Data Areas, Vol 4
• z/OS V1R12.0 JES2 Data Areas, Vol 5
• z/OS V1R12.0 JES3 Data Areas, Vol 1
• z/OS V1R12.0 JES3 Data Areas, Vol 2
• z/OS V1R12.0 JES3 Data Areas, Vol 3

**Changes made in z/OS Version 1 Release 11**

This document contains information that was previously presented in z/OS Information Roadmap, SA22-7500-11, which supports z/OS Version 1 Release 10.

**New information**

A new book has been added to the Communications Server library:
• z/OS V1R11 Communications Server: SNA ACF/TAP Trace Analysis Handbook, GC23-8588.

A new book has been added to the Open Systems Adapter library:
• System z9 and eServer zSeries Open Systems Adapter-Express Integrated Controller 3215 Support, SA23-2247.

**Changed information**
DFSMSdss Storage Administration Guide has been retitled to DFSMSdss Storage Administration.

DFSMSHsm Storage Administration Guide has been retitled to DFSMSHsm Storage Administration.

DFSMS Storage Administration Reference has been retitled to DFSMSdfp Storage Administration. Additionally, some information from this book has been moved:

- DFSMSdss section (Part 2) is moved into DFSMSdss Storage Administration.
- DFSMSHsm section (Part 3) is moved into DFSMSHsm Storage Administration.
- DFSMSdfp section (Part 1) remains in the current book, DFSMSdfp Storage Administration.

Deleted information

The following books have been removed from the library:

- C/C++ Legacy Class Libraries Reference, SC09-7652.
- z/OS Integrated Security Services LDAP Client Programming, SC24-5924
- z/OS Integrated Security Services LDAP Server Administration and Use, SC24-5923
Chapter 1. Accessing, viewing, and printing z/OS documentation

The following topics explain how you can obtain z/OS information on the Internet, and in softcopy or hardcopy.

Accessing z/OS information on the Internet

z/OS documentation is available on the Internet in BookManager® and PDF format for all z/OS releases at:

http://www.ibm.com/systems/z/os/zos/bkserv/

IBM provides alternate ways to navigate the z/OS library on the Internet.

• z/OS Information Center

The z/OS Information Center delivers product documentation using the IBM Eclipse Help System framework. The content of the z/OS Information Center (information for z/OS base elements and optional features) is identical to what is in the traditional BookManager and PDF formats, however the presentation differs to some degree. An advantage to using the information center is that it is indexed by Google and other internet search engines, so locating information is easier. Additionally, you can create custom search scopes that include only the information you need for a particular task or job role.

• Library Center for z/OS

z/OS Library Centers have been replaced by z/OS Information Centers starting with z/OS V1R11. Information Centers are indexed by Google and other search engines which make finding z/OS documentation even easier.

Cross-book linking among z/OS books

z/OS books include softcopy links that let you jump directly from one softcopy book to another. While reading a z/OS book, you can place the cursor under the highlighted title of a referenced z/OS book and click the mouse or press Enter to open that book. After searching and reading the related material, you can close the referenced book to return to the original book. For example, Chapter 2, "z/OS document descriptions," on page 9 contains links to the softcopy books that it describes.

Cross-book linking works for z/OS books in both BookManager and PDF format. For PDFs, the links are indicated by blue highlighting around a document or topic reference, and the linking PDFs must be in the same directory. For BookManager, cross-book linking is supported by BookManager READ/MVS on z/OS. The linked books must be uploaded to z/OS and must be located on the same bookshelf.

Cross-book linking also works among z/OS PDFs and BookManager books (served by Library Server) on the z/OS Internet library. Links on the z/OS Internet library work across elements and bookshelves. If several versions of a target book exist on the Internet library, Library Server lets you select the version you want. Cross-book linking for PDFs and book files also works among the books on the same DVD.

PDFs link to each other by file name, and IBM® changes a book's file name whenever the document is updated. Thus a link from an unchanged PDF may not connect to a new edition of a target book, because the new edition has a new file.
name. However, a link from an unchanged PDF will still connect to its original target book. Therefore, if you maintain your own PDF repository, IBM recommends that you keep multiple levels of PDFs together in the same directory, to minimize unresolved links. By contrast, BookManager documents link to each other by their base order numbers, which stay the same from release to release, so an unchanged BOOK file can link successfully to an updated target BOOK file, as long as they are on the same bookshelf.

Another fact about linking with PDFs: when you link from one PDF to another and press the Adobe Reader’s back navigation button, you return to the original spot in the first PDF. If you make the same link within a browser on the Internet, the browser’s back button takes you to the cover of the first PDF. With Library Server, however, the back button in a browser will take you back to the original spot in the first book.

**Information on DVD**

When you order z/OS, you automatically receive the comprehensive DVD collection, which is a combination of the latest z/OS Collection and the z/OS Software Products Collection with selected Redbooks® from the IBM @server zSeries® Redbooks Collection. The documents are provided in both BookManager and PDF formats when available. This collection also includes the contents of the zFavorites for zSeries CD (see below for details).

**Related information on CD-ROM**

You can purchase the following collections individually, or when you order z/OS you can purchase them by subscriptions. Purchasing a subscription entitles you to automatic shipment of all updates to the collection as long as z/OS version is orderable. If you purchase an individual copy of a collection, you do not get updates to it. Individual copies are priced lower because you receive only one edition of the collection.

- **z/OS Software Products Collection**, SK3T-4270
  Includes libraries for multiple releases of related software products that run on z/OS. All documents are provided in BookManager format and in PDF format, when available. When you order the collection as a feature of z/OS, you receive a continuing subscription for a one-time price.

- **z/OS Security Server RACF® Collection**, SK3T-4272
  Includes z/OS Security Server and other software product documents that contain significant information about z/OS Security Server RACF in one package. The z/OS Security Server documents are provided in PDF and BookManager formats; the other documents are provided in BookManager format only. This collection also includes other materials of interest to the RACF Security Administrator. When you order the collection as a feature of z/OS, you receive a continuing subscription for a one-time price.

- **IBM @server zSeries Redbooks Collection**, SK3T-7876
  Includes IBM Redbooks that apply to the zSeries platform and to host networking. The documents are arranged into subject bookshelves such as “Application Development zSeries Redbooks” and “Networking zSeries Redbooks.” When you order the collection as a feature of z/OS, you receive a continuing subscription for a one-time price.
zFavorites for zSeries CD

To find the most popular z/OS and zSeries information on the Web, order a copy of:

- **zFavorites for zSeries**, GK3T-4331

  A mini-CD full of Internet links, the zFavorites for zSeries CD connects you to the most popular z/OS and zSeries Web sites, including the LookAt and wizards sites for interactive help and configuration dialogs. zFavorites also points to helpful information sites by categories such as products, product documentation, software and solutions, support and more. A copy of the zFavorites CD is shipped with the [z/OS Hot Topics Newsletter](http://www.ibm.com/systems/z/os/zos/zhotopic/) and the contents of the zFavorites for zSeries CD is included on the z/OS Version 1 Release 13 and Software Products DVD Collection.

For the online version of zFavorites, see:

Viewing and printing z/OS softcopy information

There are a number of ways that you can view and print z/OS information, depending on your needs and what facilities are available to you. IBM provides the [z/OS Collection](http://www.ibm.com/systems/z/os/zos/zcollection/) and the [z/OS and z/OS Software Products DVD Collection](http://www.ibm.com/systems/z/os/zos/dvd_collection/), which contain BookManager and PDF formats of the z/OS documents. Both softcopy formats (as well as additional documents and information) are also available from the z/OS Internet library at:

A BookManager softcopy document is the same file, regardless of the BookManager product or the operating system that you are using. The z/OS product includes both BookManager READ and Library Server (formerly BookManager BookServer) as base elements.

The method that you use to access and print documents or sections of documents will depend on whether your company has established its own softcopy repository of IBM information, or whether you are accessing the information on the Internet or from the DVD.

Viewing softcopy information

Here are some common methods that you can use to view z/OS softcopy information.

- If your company has established a softcopy repository on z/OS:
  - BookManager READ/MVS allows users on the z/OS system to access and read documents.
  - Library Server (BookManager BookServer) allows users to access and read documents over an Internet or intranet connection using an HTML browser.

- If you are accessing the information from IBM's z/OS Internet library:
  - Almost all of the z/OS documents are provided as BookManager documents, and they can be accessed and searched from your browser using the functions provided by Library Server (BookManager BookServer.)
  - The z/OS documents are also provided in PDF format. Although the primary purpose for providing these files is for printing, they can also be viewed online.
Ordering Information

- Some documents are provided as HTML files, and they can be accessed and searched using your browser functions.
- If you are accessing the information from CD-ROM (such as the z/OS Collection):
  - The BookManager softcopy can be viewed online using any supported IBM BookManager reader, such as the IBM Softcopy Reader, which can be installed from the tools disc of the z/OS Collection. IBM readers allow you to read any BookManager document.
  - The PDF files can be viewed online using the Adobe Reader. If you need information on installing and using an Adobe Reader, see the Adobe Web site at http://www.adobe.com.
- The documents can also be accessed in repositories on other operating systems by using the BookManager READ products or Adobe Readers for those systems.

Printing softcopy information

You can print hardcopy when you need it from the softcopy files provided for the z/OS documentation, whether you are accessing those files from DVD, the z/OS Internet library, or a local repository or Web site.

- If you are viewing a softcopy file and you want hardcopy of a topic or two, you can print from the BOOK or PDF file you are viewing.
- For a complete hardcopy document that looks like a traditional manual you would order from IBM, print the PDF file for the document.

Printing a PDF file

In the workstation environment, you use an Adobe Reader to view and print PDF files. For large or graphically complex documents that need to be printed on an AFP printer, you might want to have the host handle the transforms, instead of doing it on the workstation before sending the file.

To print PDFs from a host repository you can use z/OS and the optional Infoprint Server feature to expand your options for printing PDF files.

Using an Adobe Reader

Install an Adobe Reader on your computer. The z/OS Collection contains a recent level of an Adobe Reader (at no extra charge), which you can install using the tools disc. You can also go to the Adobe Web site at www.adobe.com for other readers or more information.

- Open the PDF you want to print. The PDF can be on a CD-ROM, DVD, on the z/OS Internet library, or any where you can view it with an Adobe Reader
- Select the Reader's Print option
- Select the desired printer and specify other print options as appropriate.
- Click OK.

If you decide to print a subset of a document from a PDF file, the pages (as understood by Adobe Reader) are totally sequential. The Reader views the front cover as page 1. There are no Roman numeral page numbers for the front matter, no section numbering. When you specify the pages to print, enter the page numbers from the Reader's point of view. Check the page box at the bottom of the screen and not as they appear on the individual pages of the document.

Using a LAN- or host-attached AFP printer

It's not feasible to print large or graphically complex PDF files on the typical desktop or LAN-attached printer. z/OS Infoprint Server with Infoprint Transforms to AFP for
z/OS (5655-N60) allows you to print high-quality hardcopy of PDF files on high-speed LAN-attached or host-attached AFP printers managed by PSF for z/OS.

Workstation users on a LAN connected to z/OS can print PDFs from a CD-ROM, the Web, or the LAN. Host users can print PDFs from an MVS™ or HFS data set, such as a host repository of softcopy files, or PDFs uploaded from a CD-ROM. For details, see the documentation for Infoprint Server and Infoprint Transforms on the z/OS Collection or on the z/OS Internet library at:
http://www.ibm.com/systems/z/os/zos/bkserv/

Printing from a BOOK file
How to print topics from a BOOK file depends on how you are viewing that file:
- From your workstation, with IBM Softcopy Reader (for example, to read a BOOK file from a CD-ROM).
- From the z/OS Internet library, which uses Libary Server (IBM BookManager BookServer) to display BookManager files.
- From a z/OS host, with BookManager READ.

Because the printout is from the BOOK file itself, the output looks like the BOOK file, with numbered sections and subsections instead of page numbers. You should only use the BOOK file to print a topic or two, and not the whole document.

Using IBM Softcopy Reader
To print the topic you are currently viewing:
- Click the Print icon or go to File --> Print to open a Print window.
- Click the Current® button. This opens your workstation Print window.
- Complete the print options in your workstation Print window, then click OK to print the current topic.

To print selected topics:
- Select the desired topics in the "table of contents" frame.
- Hold down the Shift key to select a list of topics, or hold down the Ctrl key to select specific topics.
- Click the Print icon or go to File --> Print to open a Print window.
- Click the Selected button. This opens your workstation Print window.
- Complete the print options in your workstation Print window, then click OK to print the selected topics.

Using the z/OS Internet library
Printing from the z/OS Internet library gives you a very high-quality output. To print the topic you are currently viewing:
- Click your browser Print icon. Follow the usual steps for printing from your browser.

To print select topics:
- Click the Library Server (BookManager BookServer) Print icon (not your browser Print icon) to a Print Preview window.
- Highlight the desired topics from the selection box. Hold down the Shift key to select a list of topics or hold down the Ctrl key to select specific topics.
- Click the Selected topics button. You then see a formatted preview of the topics.
Ordering Information

- Use your browser’s print facility to produce a hardcopy document of the information shown.

To print a whole document: the Library Server on the z/OS Internet library displays an icon for the corresponding PDF file, if available, next to each BOOK file on a bookshelf. If you find a document you want to print in its entirety under Library Server, you can click the corresponding PDF file and print it as described in "Printing a PDF file" on page 4.

Using BookManager READ

If your company has established a softcopy repository on z/OS, you can use the Print option of BookManager READ to get hardcopy of a topic or two. However, BookManager READ by itself (without other programs such as DCF and BookMaster®, which are not part of z/OS) provides a lower quality print than printing from Library Server. It is essentially a screen print.

Sometimes, though, BookManager READ may be the only available option. In that case, here’s how to proceed:
- Open the document.
- Set your print options by selecting the Options pull-down menu.
- Select option 5 (Set print options) and specify the desired options.
- Use the PRINT command to print one or more topics in the document.
  (BookManager READ/MVS invokes the ISPF panels you normally use to print at your site.)
- Enter the command in one of the following ways:
  - PRINT PRINT topic1
  - PRINT topic1 TO topic2
  - PRINT topic1 FOR number-of-topics.

To print the current topic, enter the PRINT command without operands. To print all of a topic (such as 1.0), including its subtopics: enter the next topic number (such as 2.0), then prev. Make note of the last topic number (for example, 1.6.4), then enter the PRINT command with the complete range (PRINT 1.0 TO 1.6.4).

Hardcopy documents

When you order z/OS, you receive the following hardcopy documents:
- z/OS Hot Topics Newsletter, GA22-7501
- z/OS Program Directory, GI10-0670

For other books, PDF files provide the best form of hardcopy. See "Viewing and printing z/OS softcopy information" on page 3 for information on printing the books provided in PDF format on the z/OS Internet library or the z/OS Collection. A few books are also orderable in hardcopy; you can order them as described in "Ordering hardcopy documents or softcopy collections" on page 7. Table 1 on page 51 indicates whether a document is available in hardcopy. You can also order hardcopy documents by using the IBM Publications Center on the World Wide Web, located at:
  http://www.ibm.com/publications/servlet/pbi.wss
Ordering Information

Ordering hardcopy documents or softcopy collections
The document you are reading, [z/OS Information Roadmap](http://www.ibm.com/publications/servlet/pbi.wss) (SA22-7500), provides descriptions of the z/OS documents and softcopy collections. It is helpful if you are planning to order hardcopy documents or softcopy collections.

In the U.S. and other countries
For a fee, you can order hardcopy documents or softcopy collections by one of the following methods:
- Access the IBM Publications Center on the World Wide Web, located at:
  Select a country and then “Search for publications”
  The IBM Publications Center accepts orders by credit card and, in many countries, by customer number. See the Publications Center Web site for details.
- Contact your IBM representative or call your local IBM office and ask for the documentation department.

In the U.S. only
For a fee, you can order hardcopy documents or softcopy collections by using a toll-free “800” telephone number or by sending an order form to IBM by fax or direct mail as follows:

**Phone:**
- 1-800-879-2755 (for individual copies)
- 1-800-426-2255 and mention priority code LE001 (for softcopy collection features)

**Fax:**
- 1-800-445-9269

**Direct mail:**
IBM Corporation
PO Box 29570
Raleigh, NC 27626-0570

You can order hardcopy documents or softcopy collections using the IBM Publications Center at:
You can charge the documents or collections to a credit card or customer number.

You can subscribe to hardcopy documents or softcopy collections through the Publication Notification System (PNS) at the IBM Publications Center. PNS notifies you by e-mail when an update is made to a publication in your PNS profile. You will then need to place an order to receive the item. You will be billed when the publication is shipped. You continue to receive notifications about publication updates until you delete the publication from your PNS profile.

In Canada only
For a fee, you can order hardcopy documents or softcopy collections by using a toll-free “800” telephone number or by sending an order form to IBM by fax, Internet, e-mail, or direct mail as follows:

**Phone:**
- 1-800-426-4968

**FAX:**
- 1-403-267-4455

**Internet:**

Chapter 2. z/OS document descriptions

This section contains descriptions of the z/OS publications, organized by element, starting with the system-level z/OS documents.

z/OS system-level documents

This section describes documentation that applies to z/OS as a whole, not to a specific element in z/OS.

- **z/OS Hot Topics Newsletter** (GA22-7501)
  Contains articles about the delivery, installation, management, use, and documentation of z/OS elements and features.

- **z/OS Information Roadmap** (SA22-7500)
  Describes the information associated with z/OS including z/OS system-level documents and documents for the participating elements and features.

- **z/OS Introduction and Release Guide** (GA22-7502)
  Describes the contents and benefits of z/OS as well as the planned packaging and delivery of the product. This document includes descriptions of the new functions in each release.

- **z/OS Licensed Program Specifications** (GA22-7503)
  Provides the warranty for z/OS. It is provided in PDF format only.

- **z/OS Migration** (GA22-7499)
  Provides information on how to migrate to z/OS Version 1 Release 13 from previous releases of z/OS.

- **z/OS Planning for Installation** (GA22-7504)
  Helps you write an installation plan by providing the following information:
  - Basics of z/OS
  - Help for deciding on the software installation method
  - Driving system software and hardware requirements
  - Target system software and hardware requirements
  - Minimum levels of stand-alone products that run with z/OS

  An installation plan skeleton is included in the document. For the interactive edition of this document, see the z/OS Installation Planning Wizard at:

- **z/OS Planning for Multilevel Security and the Common Criteria** (GA22-7509)
  Describes how to set up a secure system across z/OS elements to ensure compliance to Common Criteria Certification.

- **z/OS Planning for Sub-Capacity Pricing**
SA22-7999
Describes how to plan for and set up your system for subcapacity pricing for IBM products.

**System z Platform Test Report for z/OS and Linux Virtual Servers**
SA22-7997
The zSeries Platform Test Report documents the efforts of a team of IBM z/Architecture testers and system programmers simulating a customer production environment. This quarterly report describes cross-product and integrated testing in a Parallel Sysplex and includes testing of elements and features of z/OS that are not necessarily sysplex oriented. z/OS and sysplex customers should find this experience-driven information extremely useful.

z/OS Program Directory
Gi10-0670
Contains information concerning the material and procedures associated with the installation of z/OS Version 1 Release 13. The z/OS Program Directory is not an orderable publication.

**z/OS Summary of Message and Interface Changes**
SA22-7505
Describes the changes to messages and interfaces for individual elements of z/OS. This document is provided in softcopy only on the message bookshelf of the z/OS Version 1 Release 13 Collection.

z/OS Using the Sub-Capacity Reporting Tool
SG24–6522
Describes the Sub-Capacity Reporting Tool. This document is provided in softcopy only on the Internet at:
http://www.ibm.com/systems/z/resources/swprice/subcap/scrt/

**z/OS DOC APAR and PTF ++HOLD Documentation**
GA22-7820
Contains the latest information updates from z/OS Documentation APARs and PTF cover letters. Updated weekly, this online document lists documentation changes before they are incorporated into z/OS publications. This document is available on the web, at:
http://publibz.boulder.ibm.com/cgi-bin/bookmgr_OS390/Shelves/ZDOCAPAR

**ServerPac: Using the Installation Dialog**
SA22-7815
Explains how to use the CustomPac installation dialog to install a ServerPac order. This document is shipped only with ServerPac orders; it is not shipped with any of IBM's CustomPac offerings, such as SystemPac®, FunctionPac, ProductPac®, RefreshPac, or Selective Follow-on Services (SFS).

**IBM Health Checker for z/OS and Sysplex: User's Guide**
SA22-7994
Contains information needed to install and use IBM Health Checker for z/OS.

z/OS Problem Management
BDT

This section describes documents for BDT (Bulk Data Transfer), and the BDT File-to-File and BDT SNA NJE features.

**z/OS BDT Commands**
SA22-7512
Describes all BDT commands.

**z/OS BDT Diagnosis Reference**
GA22-7514
Explains how to request and read a BDT formatted dump, explains how to find and read BDT information in an MVS SVC dump, and shows the layouts of BDT data areas.

**z/OS BDT Installation**
GA22-7511
Explains how to define BDT to MVS and ACF/VTAM, allocate BDT and TQI data sets, write BDT initialization statements, write BDT and TQI start procedures, and write BDT user exit routines.

**z/OS BDT Messages and Codes**
SA22-7513
Explains all BDT messages and completion codes.

BDT File-to-File

**z/OS BDT File-to-File Transaction Guide**
SA22-7515
Explains how to create and submit transactions to copy data sets.

BookManager

This section describes documents for BookManager BUILD and BookManager READ.

**IBM BookManager BUILD/MVS: Installation Planning and Customization**
SC38-2037
Describes how to install online documents and bookshelves on the host system. It also explains how to customize BookManager BUILD.

**IBM BookManager READ/MVS and BUILD/MVS: General Information**
GC38-2032
Introduces IBM BookManager BUILD/MVS and IBM BookManager READ/MVS, which lets users create and use online documents. This document describes online documents and their similarities to printed documents. It also explains how to create online documents and
BookManager

bookshelves, and lists the requirements for installing and using both IBM BookManager READ/MVS and IBM BookManager BUILD/MVS.

**IBM BookManager READ/MVS: Displaying Online Books**
**SC38-2034**
Shows how to use the BookManager READ panels to perform the most commonly used functions, such as starting and ending a READ session, searching documents and bookshelves, and printing softcopy information.

**IBM BookManager READ/MVS: Getting Started**
**SC38-2033**
Helps users get started using the READ/MVS panels to display information online. It shows the actions available on the panels and describes how to perform the most common actions.

**IBM BookManager READ/MVS: Installation Planning and Customization**
**SC38-2035**
Helps users plan the installation of IBM BookManager READ for use in a z/OS environment. It also explains how to customize BookManager READ, which lets you organize, display, and search online documents.

**Common Information Model**

**z/OS Common Information Model User's Guide**
**SC33-7998**
The z/OS Common Information Model User's Guide describes the overall CIM data model and how to use it, and also describes the z/OS specific supplements and differences, as well as installation, configuration and security instructions for z/OS systems.

**Communications Server**

This section describes documents for the Communications Server.

For help in configuring z/OS Communications Server IP, see the z/OS IP Configuration Wizard at: [http://www.ibm.com/systems/z/os/zos/wizards/](http://www.ibm.com/systems/z/os/zos/wizards/)

**z/OS Communications Server: New Function Summary**
**SC31-8771**
Describes new IP and SNA function. Helps you plan for IP and SNA, whether you are migrating from a previous version or installing z/OS for the first time. It summarizes what is new in the release and identifies the suggested and required modifications needed to use the enhanced functions.

**z/OS Communications Server: CMIP Services and Topology Agent Guide**
**SC31-8828**
Describes the SNA LU 6.2 programming interface for host application programs. It applies to programs that use LU 6.2 sessions.

**z/OS Communications Server: CSM Guide**
**SC31-8808**
Describes how to use the communications storage manager.

**z/OS Communications Server: IP and SNA Codes**
Communications Server

SC31-8791
Describes the codes associated with SNA and IP.

z/OS Communications Server: IP Sockets Application Programming Interface Guide and Reference
SC31-8788
Describes the syntax and options of the socket calls for the C, REXX, Assembler, PL/1, COBOL, PASCAL languages. It also documents how to use the VMCF and XTI interfaces.

z/OS Communications Server: IP CICS Sockets Guide
SC31-8807
Describes how to set up, write application programs for, and diagnose problems with the socket interface for CICS® using IP.

z/OS Communications Server: IP Configuration Guide
SC31-8775
Contains concepts and guidance, explaining an overall approach to IP configuration.

z/OS Communications Server: IP Configuration Reference
SC31-8776
Describes parameters and options, syntax of statements used during configuration.

z/OS Communications Server: IP Diagnosis Guide
GC31-8782
Provides information about diagnosing problems occurring in IP networks. It can help you determine if a specific problem is an IP problem and also tells you how to report it to the IBM Software Support Center.

z/OS Communications Server: IP IMS Sockets Guide
SC31-8830
Describes how to write application programs that use the IMS™ IP application development services provided by IP.

z/OS Communications Server: IP Messages Volume 1 (EZA)
SC31-8783
Describes the messages beginning with the prefix EZA that occur in IP. This document can also help with problem determination in an IP implementation.

z/OS Communications Server: IP Messages Volume 2 (EZB, EZD)
SC31-8784
Describes the messages beginning with the prefix EZB and EZD that occur in IP. This document can also help with problem determination in an IP implementation.

z/OS Communications Server: IP Messages Volume 3 (EZY)
SC31-8785
Describes the messages beginning with the prefixes: EZY that occur in IP. This document can also help with problem determination in an IP implementation.

z/OS Communications Server: IP Messages Volume 4 (EZZ, SNM)
Communications Server

**SC31-8786**
Describes the messages beginning with the prefixes: EZZ and SNM that occur in IP. This document can also help with problem determination in an IP implementation.

**z/OS Communications Server: IPv6 Network and Application Design Guide**
**SC31-8885**
Describes concepts of z/OS Communications Server's support of IPv6, coexistence with IPv4, and migration issues. It is intended for programmers and system administrators who are familiar with TCP/IP, MVS, UNIX System Services, and TSO/E.

**z/OS Communications Server: IP Network Print Facility**
**SC31-8833**
Describes how to customize and use a print feature for IP. This feature takes print request from a SNA or JES and uses IP to route them to remote printers.

**z/OS Communications Server: IP Programmer's Guide and Reference**
**SC31-8787**
Describes the syntax and use of high-level application functions that enable you to write your own applications in an IP environment. The functions include authenticating access, use of distributed databases, distributed processing, network management, and device sharing (SNMP, X Windows, RPC, and NCS).

**z/OS Communications Server: IP System Administrator's Commands**
**SC31-8781**
Describes common IP commands used during system administration and configuration.

**z/OS Communications Server: IP User's Guide and Commands**
**SC31-8780**
Describes the end user functions and commands supported by IP, such as Telnet, FTP, and SMTP.

**z/OS Communications Server: Quick Reference**
**SX75-0124**
Contains essential information about SNA and IP operator commands.

**z/OS Communications Server: SNA Customization**
**SC31-6854**
Provides information that enables you to customize SNA by modifying tables and creating installation-wide exit routines.

**z/OS Communications Server: SNA Data Areas Volume 1**
**GC31-6852**
Describes SNA data areas and can be used to read a SNA dump. It is intended for IBM programming service representatives and customer personnel who are diagnosing problems with SNA. This volume includes request response units, GDS variable session keys, control vectors and CSM data areas.

**z/OS Communications Server: SNA Data Areas Volume 2**
**GC31-6853**
Describes SNA data areas and can be used to read a SNA dump. It is
intended for IBM programming service representatives and customer personnel who are diagnosing problems with SNA.

z/OS Communications Server: SNA Diagnosis Vol 1, Techniques and Procedures
GC31-6850
Helps you identify a SNA problem, classify it, and collect information about it before you call the IBM Support Center. The information collected includes traces, dumps, and other problem documentation.

z/OS Communications Server: SNA Diagnosis Vol 2, FFST Dumps and the VIT
GC31-6851
Helps you identify a SNA problem, classify it, and collect information about it before you call the IBM Support Center. The information collected includes using FFST™ dumps and interpreting VIT records.

z/OS Communications Server: SNA Messages
SC31-8790
Describes messages, beginning with the prefixes ELM, IKT, IST, ISU, IUT, IVT and USS, and other information associated with SNA messages.

z/OS Communications Server: SNA Network Implementation Guide
SC31-8777
Presents the major concepts involved in implementing a SNA network.

z/OS Communications Server: SNA Operation
SC31-8779
Serves as a reference for programmers and operators who need detailed information about specific operator commands. The information includes:
- SNA commands and start options
- Logon manager commands
- DISPLAY output examples
- VSCS commands.

z/OS Communications Server: SNA Programmer's LU 6.2 Guide
SC31-8811
Describes the SNA LU 6.2 programming interface for host application programs. It applies to programs that use LU 6.2 sessions.

z/OS Communications Server: SNA Programmer's LU 6.2 Reference
SC31-8810
Provides reference material for the SNA LU 6.2 programming interface for host application programs.

z/OS Communications Server: SNA Programming
SC31-8829
Describes how to use SNA macro instructions to send data to and receive data from a terminal or another application.

z/OS Communications Server: SNA Resource Definition Reference
SC31-8778
Describes each SNA definition statement, start option, and macro instruction. It also describes NCP definition statements that affect SNA.

z/OS Communications Server: SNA Resource Definition Samples
SC31-8836
Contains the VTAM® definition statements to help system programmers...
Communications Server

define resources in a VTAM network. Use this document in conjunction with the VTAM Network Implementation Guide and the Resource Definition Reference.

Cryptographic Services

This section describes documents for Cryptographic Services, including ICSF, Open Cryptographic Services Facility, System Secure Sockets Layer (SSL) base, and PKI.

**z/OS Cryptographic Services ICSF Administrator's Guide**
SA22-7521
Explains how to administer ICSF. It describes managing cryptographic keys, entering keys into the Cryptographic Key Data Set (CKDS) and using the key generator utility program (KGUP).

**z/OS Cryptographic Services ICSF Writing PKCS #11 Applications**
SA23-2231
Describes the support for PKCS #11 provided by the z/OS Integrated Cryptographic Service Facility (ICSF). This document is primarily intended for application programmers who want to write PKCS #11 applications for z/OS.

**z/OS Cryptographic Services ICSF Application Programmer's Guide**
SA22-7522
Describes the callable services provided by ICSF. It is helpful to application programmers using the security application programming interface (API) to access cryptographic functions.

**z/OS Cryptographic Services ICSF Messages**
SA22-7523
Explains the ICSF messages and the routing and descriptor codes for those messages.

**z/OS Cryptographic Services ICSF Overview**
SA22-7519
Introduces ICSF and provides information about the capabilities and benefits of using cryptographic services in a z/OS environment.

**z/OS Cryptographic Services ICSF System Programmer's Guide**
SA22-7520
Explains how to initialize and customize ICSF. It also contains information and problem diagnosis information.

**z/OS ICSF TKE PCIX Workstation User's Guide**
SA23-2211
Explains installing, implementing and administering Version 5.0 of the IBM Trusted Key Entry product. It is intended for anyone who manages cryptographic keys, usually a security administrator. It includes information to support the following tasks for the solution: Planning Installing Administering Customizing Using
- Planning
- Installing
- Administering
- Customizing
Cryptographic Services

- Using

**z/OS Open Cryptographic Services Facility Application Programming**
SC24-5899
Provides an overview of the Open Cryptographic Services Facility (OCSF). It explains how to integrate OCSF into applications and contains a sample OCSF application. It also defines the interfaces that application developers employ to access security services provided by the OCSF framework and service provider modules. It also describes specific information about the individual service providers.

**z/OS Open Cryptographic Services Facility Service Provider Module Developer's Guide and Reference**
SC24-5900
Describes the features common to all OCSF service provider modules. It defines the interfaces for certificate, trust and data library service providers. Service provider developers must conform to these interfaces for the individual service provider modules to be accessible through the OCSF framework.

**z/OS Cryptographic Services System SSL Programming**
SC24-5901
Contains guidance and reference information that an application programmer needs to use the System Secure Sockets Layer (SSL) callable services programming interfaces. SSL is a communications layer that provides data privacy and integrity as well as server and client authentication based on public-key certificates. The callable services programming interfaces provide protected communications over a TCP/IP socket communication path.

**z/OS Cryptographic Services PKI Services Guide and Reference**
SA22-7693
Provides detailed procedures for planning, setting up, and using PKI Services. It also includes messages, log information, and coding samples.

---

**DFSMS**

This section describes documents for DFSMSdfp, DFSMSdss, DFSMSshm, and DFSMSrmm, and DFSMSStvs.

**SC26-7473**
This book provides an introduction and step-by-step instructions for implementing the new functions in DFSMS, including functions of DFSMSdfp, DFSMSdss, DFSMSshm, DFSMSrmm, and DFSMSStvs.

**z/OS DFSMS Access Method Services for Catalogs**
SC26-7394
Describes IDCAMS commands for using integrated catalog facility catalogs.

**z/OS DFSMS Advanced Copy Services**
SC35-0428
Provides an introduction and instructions for implementing and using the remote copy disaster recovery and workload migration tool.

---

Chapter 2. z/OS document descriptions  17
DFSMS

**SC26-7401**
Contains information on establishing checkpoints during a program and restarting a job.

**z/OS DFSMS DFM Guide and Reference**
**SC26-7395**
Contains information about accessing and creating MVS data sets from remote systems.

**z/OS DFSMS Implementing System-Managed Storage**
**SC26-7407**
Describes tasks for migrating to system-managed storage and optimizing use of the storage management subsystem.

**z/OS DFSMS Installation Exits**
**SC26-7396**
Contains instructions on exit routines and modules that extend or replace IBM-supplied functions.

**z/OS DFSMS Introduction**
**SC26-7397**
Provides an overview of DFSMS.

**z/OS DFSMS Macro Instructions for Data Sets**
**SC26-7408**
Contains access method macro instructions for processing user data sets.

**z/OS DFSMS Managing Catalogs**
**SC26-7409**
Describes techniques for managing integrated catalog facility catalogs.

**z/OS DFSMSdfp Storage Administration**
**SC26-7402**
This book merges information previously contained in the Storage Administration References for DFSMSdfp, dss, and hsm. Contains instructions for initializing and maintaining the storage management subsystem and for performing storage management tasks using ISMF panels.

Describes DFSMSdss tasks for copying, dumping, and restoring data sets and DASD volumes, and diagnosis information, including keyword search strings and other diagnostic tools.

Describes DFSMShsm tasks for managing storage, including examples of storage administrator commands and results of DFSMShsm processing. Also contains information about disaster prevention and the recovery of DFSMShsm data based on real experiences.

**z/OS DFSMS Software Support for IBM System Storage TS1140, TS1130, and TS1120 Tape Drives (3592)**
**SC26-7514**
This book describes the installation, migration, and operation of the IBM TotalStorage Enterprise Tape System 3592 software support.

**z/OS DFSMS Using Data Sets**
SC26-7410
Describes techniques for processing, protecting, and maintaining user data sets.

z/OS DFSMS Using the Interactive Storage Management Facility
SC26-7411
Describes commands and techniques for using ISMF to analyze and manage data resources.

z/OS DFSMS Using Magnetic Tapes
SC26-7412
Describes techniques for using magnetic tape volumes.

z/OS DFSMS Using the Volume Mount Analyzer
SC26-7413
Contains instructions for analyzing tape mounts with the Volume Mount Analyzer.

DFSMStf

z/OS DFSMSdfp Advanced Services
SC26-7400
Provides techniques for extending DFSMS/MVS data management capabilities and other system data operations.

z/OS DFSMSdfp Diagnosis
GY27-7618
Contains information for diagnosing DFSMSdfp-related errors, and guidance for using DFSMSdfp diagnostic tools and aids to gather failure-related information.

z/OS DFSMS OAM Application Programmer's Reference
SC35-0425
Contains information about the OAM application interface used to manipulate objects.

z/OS DFSMS OAM Planning, Installation, and Storage Administration Guide for Object Support
SC35-0426
Contains OAM planning, installation, customizing, and storage management information for optical libraries.

z/OS DFSMS OAM Planning, Installation, and Storage Administration Guide for Tape Libraries
SC35-0427
Contains OAM planning, installation, customizing, and storage management information for tape libraries.

z/OS DFSMSdfp Utilities
SC26-7414
Contains instructions for using DFSMSdfp utility programs for data, program, and device management.

DFSMStf

z/OS DFSMSdss Storage Administration
DFSMS

SC35-0423
Describes DFSMSdss tasks for copying, dumping, and restoring data sets and DASD volumes, and diagnosis information, including keyword search strings and other diagnostic tools.

DFSMShsm

z/OS DFSMShsm Diagnosis
GC52-1083
Provides diagnosis information for DFSMShsm, including instructions for building keyword search strings and other diagnostic tools. Contains information about the DFSMShsm control blocks and data areas used during diagnostic and maintenance procedures.

z/OS DFSMShsm Implementation and Customization Guide
SC35-0418
Provides guidance for creating and maintaining DFSMShsm-owned data sets, including migration and coexistence considerations.

z/OS DFSMShsm Managing Your Own Data
SC35-0420
Contains DFSMShsm user macros and user command syntax, conventions, and coding examples.

z/OS DFSMShsm Storage Administration
SC35-0421
Describes DFSMShsm tasks for managing storage, including examples of storage administrator commands and results of DFSMShsm processing. Also contains information about disaster prevention and the recovery of DFSMShsm data based on real experiences.

DFSMShsm Storage Administration Reference
SC35-0422
The information previously contained in this book has been consolidated into DFSMS Storage Administration Reference.

DFSMSrmm

z/OS DFSMSrmm Application Programming Interface
SC26-7403
Describes how to use the DFSMSrmm Application Programming Interface to obtain information about DFSMSrmm resources.

z/OS DFSMSrmm Diagnosis Guide
GY27-7619
Contains information for diagnosing DFSMSrmm-related errors, including how to use DFSMSrmm diagnostic tools.

z/OS DFSMSrmm Managing and Using Removable Media
SC26-7404
Provides instructions for using DFSMSrmm to manage removable media.

z/OS DFSMSrmm Implementation and Customization Guide
SC26-7405
Contains information about implementing and customizing the functions of DFSMSrmm.
This section describes documents for DFSORT.

**z/OS DFSORT Application Programming Guide**

This guide gives you the necessary information to use DFSORT to sort, merge, and copy data sets, including how to prepare DFSORT control statements, how to calculate storage requirements, and how to use the program exits. It also contains examples of DFSORT control statements and program exit routines.

**z/OS DFSORT: Getting Started**

This document is intended to help you get started using DFSORT to sort, merge, and copy data sets. It also contains step-by-step procedures for writing applications.

**z/OS DFSORT Installation and Customization**

This guide is intended to help you install and customize DFSORT. It is designed to be used with the DFSORT Program Directory, which contains the installation procedures.

**z/OS DFSORT Messages, Codes and Diagnosis Guide**
DFSORT

SC26-7525
This document is intended to help you interpret informational and error messages issued by DFSORT. It contains explanations of and possible responses to these messages. It also contains the return codes and diagnostic messages issued by DFSORT. It shows you how to describe DFSORT program failures with a set of keywords used by the support center.

z/OS DFSORT Tuning Guide
SC26-7526
This guide provides you with information about tuning DFSORT. It offers suggestions for reducing the use of system resources and achieving better turnaround time for applications that use DFSORT.

Distributed File Service

This section describes documents for Distributed File Service (DFS).

z/OS Distributed File Service Messages and Codes
SC24-5917
Contains Distributed File Service messages and codes.

z/OS Distributed File Service SMB Administration
SC24-5918
Provides guidance and reference information for system and network administrators to use when they work with the Server Message Block (SMB) support of Distributed File Service. SMB is a protocol for remote file/print access used by Windows.

z/OS Distributed File Service zSeries File System Administration
SC24-5989
Provides guidance and reference information for system and network administrators to use when they work with the zSeries File System Administration support of Distributed File Service.

EREPP

This section describes documents for EREP.

EREP Reference
GC35-0152
Provides supplementary material to the User's Guide, including an overview of EREP parameters, control statements, and records; a listing of EREP messages and codes; examples of all types of output reports; and product dependent information about all supported IBM devices.

EREP User's Guide
GC35-0151
Contains detailed instructions and sample procedures for setting up and running EREP in VM, VSE, and MVS environments.

FFST

This section describes the document for First Failure Support Technology™ (FFST).

FFST/MVS FFST/VM Operations Guide
SC31-8604
Describes commands for controlling FFST operation and how to use FFST output to identify and analyze software events.

GDDM

This section describes documents for GDDM® (including PCLK and OS/2 Link) and GDDM-REXX.

**GDDM Base Application Programming Guide**
SC33-0887
Contains guidance information for writing programs that request or receive the services of GDDM.

**GDDM Base Application Programming Reference**
SC33-0868
Contains complete descriptions of all the GDDM program calls and their parameters.

**GDDM Diagnosis**
SC33-0870
Contains problem determination procedures and information needed to diagnose problems encountered in the use of GDDM.

**GDDM General Information**
GC33-0866
Introduces the IBM GDDM series of licensed programs. It also describes new functions, ways in which GDDM is used, software and hardware requirements and the GDDM library.

**GDDM-GKS Programming Guide and Reference**
SC33-0334
Describes how to write and run application programs that use GDDM-GKS, the GDDM Graphical Kernel System licensed program.

**GDDM Image View Utility**
SC33-0479
Describes how to use GDDM-IVU interactively and how to use its application programming interface to add image-handling capabilities to data processing systems.

**GDDM Messages**
SC33-0869
Provides the information that helps users respond to messages issued by GDDM.

**GDDM/MVS Program Directory**
GC33-1801
Provides information about installation, including planning, testing, and servicing GDDM information.

**GDDM System Customization and Administration**
SC33-0871
Describes:
- How to set up and maintain device support for GDDM users
- The effects of GDDM's external defaults and how to customize them
**GDDM**

- Code-page, font, and symbol-set support, and how to customize them
- Factors that affect GDDM performance and how to tune them
- How to replace modules

**GDDM User's Guide**
**SC33-0875**
Describes how to display data and how to manipulate, print, plot, and save displayed data. It also describes installing and using GDDM-PCLK and GDDM-OS/2 Link.

**GDDM Using the Image Symbol Editor**
**SC33-0920**
Describes how to use the GDDM Image Symbol Editor to create and edit symbols.

**GDDM-PGF**

This section describes documents for GDDM-PGF.

**GDDM-PGF Application Programming Guide**
**SC33-0913**
Provides guidance information for users of the Interactive Chart Utility (ICU), the ICU application programming interface, and the Presentation Graphics routines.

**GDDM-PGF Interactive Chart Utility**
**SC33-0328**
Describes how to use the ICU to create and display business graphics.

**GDDM-PGF OPS User's Guide**
**SC33-1776**
Describes how to use the Online Presentation System (OPS) to create and display dynamic presentations online, to create high quality foils and pictures, and to view online conventional line-mode print files.

**GDDM-PGF Programming Reference**
**SC33-0333**
Provides reference information for users of the application-programming interfaces of GDDM-PGF.

**GDDM-PGF Vector Symbol Editor**
**SC33-0330**
Describes how to use the Vector Symbol Editor to produce symbols and logos for use in charts and other business graphics.

**Hardware Configuration Definition**

This section describes documents for Hardware Configuration Definition (HCD).

**z/OS and z/VM HCD Messages**
**SC33-7986**
Describes the messages issued by HCD.

**z/OS HCD Planning**
GA22-7525
Explains the concepts, actions, and general planning considerations needed to define and maintain an I/O configuration using HCD.

z/OS HCD Reference Summary
SX33-9032
Provides a short overview of HCD tasks, navigation options, and information about online help. It also describes the relations among the configuration objects and lists the actions and action codes for each object.

z/OS HCD Scenarios
SC33-7987
Contains about 20 scenarios of common hardware configuration tasks.

z/OS HCD User's Guide
SC33-7988
Explains how to use HCD to define, activate, modify or view hardware configurations, and query supported hardware. HCD also permits you to maintain and compare IODFs, obtain graphical and textual reports of configurations, and migrate existing configuration data.

Hardware Configuration Manager
This section describes the document for Hardware Configuration Manager (HCM).

z/OS and z/VM HCM User's Guide
SC33-7989
Explains how to install and use HCM to create, manage and maintain hardware configuration information.

High Level Assembler
This section describes documents for High Level Assembler and the High Level Assembler Toolkit feature.

HLASM General Information
GC26-4943
Provides an overview of High Level Assembler.

HLASM Installation and Customization Guide
SC26-3494
Contains installation, customization, diagnosis, and maintenance information for High Level Assembler.

HLASM Language Reference
SC26-4940
Contains language reference information to help users code High Level Assembler language programs.

HLASM Programmer's Guide
SC26-4941
Contains High Level Assembler product usage information.

High Level Assembler Toolkit
HLASM Toolkit Feature Debug Reference Summary
High Level Assembler

GC26-8712
Provides a reference summary to help users debug assembler language applications.

HLASM Toolkit Feature Installation and Customization Guide
GC26-8711
Contains information for installing and maintaining the High Level Assembler Toolkit Feature.

HLASM Toolkit Feature Interactive Debug Facility User's Guide
GC26-8709
Contains both reference and guidance information for using the High Level Assembler Toolkit Feature Interactive Debug Facility.

HLASM Toolkit Feature User's Guide
GC26-8710
Contains information for using all components of the High Level Assembler Toolkit Feature (other than the Interactive Debug Facility).

IBM Encryption Facility

This section describes documents for the z/OS related feature, Encryption Facility.

Encryption Facility for z/OS: Planning and Customizing
SA23-2229
This document explains how to plan for the Encryption Facility product, including Encryption Services, Encryption Facility for z/OS Client, Encryption Facility for OpenPGP, and DFSMSdss Encryption. It also provides detailed information for the Encryption Services CSDFILEN and CSDFILDE batch programs.

Encryption Facility for z/OS: Using Encryption Facility for OpenPGP
SA23-2230
This document explains how to use Encryption Facility for OpenPGP, which is part of the product feature, IBM® Encryption Services included in IBM Encryption Facility for z/OS. It is intended for anyone who plans, installs, customizes, administers, and uses Encryption Facility for OpenPGP.

IBM Encryption Facility for z/OS: User's Guide
SA23-1349
This document explains how to plan for the Encryption Facility product, including Encryption Services, Encryption Facility for z/OS Client, Encryption Facility for OpenPGP, and DFSMSdss Encryption. It also provides detailed information for the Encryption Services CSDFILEN and CSDFILDE batch programs.

IBM HTTP Server

This section describes documents for IBM HTTP Server.

z/OS HTTP Server Planning, Installing, and Using
SC34-4826
This document explains how to plan for, install, configure, and use the IBM HTTP Server. The Programming section explains how to write external programs that interact with the HTTP Server using the Common Gateway
IBM z/OS Management Facility

This section describes the document for IBM z/OS Management Facility.

z/OS Management Facility Configuration Guide
SA38-0652
This document provides information for anyone who needs to set up and use z/OSMF or diagnose problems with this product. This document assumes that you are familiar with the z/OS operating system and its associated products.

IBM WebSphere Application Server OEM Edition for z/OS Configuration Guide
GA38-0631
This document provides information to set up and configure IBM® WebSphere® Application Server OEM Edition for z/OS. The z/OS system applications that use this product might require additional configuration steps beyond what is described in this document.

IBM Tivoli Directory Server

This section describes document supporting IBM Tivoli Directory Server.

IBM Tivoli Directory Server Client Programming for z/OS,
SA23-2214
This document describes the Lightweight Directory Access Protocol (LDAP) client application, which is part of IBM Tivoli Directory Server for z/OS. It is intended for application programmers who have previous knowledge of directory services.

IBM Tivoli Directory Server Administration and Use,
SC23-5191
This document describes the LDAP server which supports Lightweight Directory Access Protocol (LDAP) and runs as a stand-alone daemon. It is based on a client/server model that provides client access to an LDAP server. The LDAP server provides an easy way to maintain directory information in a central location for storage, updating, retrieval, and exchange. It is intended to assist LDAP administrators. LDAP administrators should be experienced and have previous knowledge of directory services. It is also intended for anyone that will be implementing the directory service.

IBM Tivoli Directory Server Messages and Codes,
SA23-2262
This document includes the messages and reason codes produced by the Lightweight Directory Access Protocol (LDAP) server.

IBM Tivoli Directory Server Plug-in Reference for z/OS,
SA76-0148
This document describes writing Lightweight Directory Access Protocol (LDAP) client applications, which are part of IBM Tivoli Directory Server for z/OS. It is intended for application programmers who have previous knowledge of directory services.
ICKDSF

**ICKDSF**

This section describes the document for ICKDSF.

*Device Support Facilities (ICKDSF) User’s Guide and Reference*

GC35-0033

Includes information about how to perform service functions, error detection, and media maintenance for IBM DASD. It also includes a summary of ICKDSF commands that support error detection and media maintenance on IBM DASD.

Infoprint Server

This section describes documents for Infoprint Server and Infoprint Server Transforms. Major components of Infoprint Server are IP PrintWay, NetSpool, Print Interface, and Infoprint Central.

This section describes documents for Infoprint Server and Infoprint Server Transforms. Major components of Infoprint Server are IP PrintWay, NetSpool, Print Interface, and Infoprint Central.

*z/OS Infoprint Server Printer Inventory for PSF*

S510-7703

Describes the Infoprint Server Printer Inventory for Print Services Facility (PSF), which lets PSF for z/OS customers who do not purchase Infoprint Server define PSF functional subsystems in the Printer Inventory. It describes how to customize Infoprint Server, start and stop Infoprint Server, administer the Printer Inventory for PSF, and diagnose problems in Infoprint Server. Note: PSF customers who purchase Infoprint Server should use the other books in the Infoprint Server library.

*z/OS Infoprint Server Introduction*

S544-5742

Provides an overview of Infoprint Server for executives and technical personnel.

*z/OS Infoprint Server Customization*

S544-5744

Describes for the system administrator how to customize Infoprint Server. It describes required environment variables, configuration files, how to write IP PrintWay and NetSpool exit routines, Print Interface filter programs, and the Print Interface API.

*z/OS Infoprint Server Messages and Diagnosis*

G544-5747

Contains messages and abend codes issued by Infoprint Servers. It also describes how to diagnose problems in Infoprint Server.

*z/OS Infoprint Server Operation and Administration*

S544-5745

Describes for the operator and system administrator how to start and stop Infoprint Server, how to use Infoprint Central, and how to set up and maintain the Infoprint Server Printer Inventory, which contains all printer information required by Infoprint Server and its components.

*Infoprint Transforms to AFP for z/OS*
Infoprint Server

G550-0443
This book describes Infoprint Transforms to AFP V2.1 for z/OS (5655-N60). It describes the transforms and how to customize them, submit transform jobs, and diagnose errors. Also, it describes how to migrate from Infoprint Server Transforms V1.1.

Infoprint Transforms from AFP for z/OS
G550-0444
This book describes V2.1 of these products:
- Infoprint Transform for AFP to HP PCL for z/OS (5655-P19)
- Infoprint Transform for AFP to Adobe PDF for z/OS (5655-P20)
- Infoprint Transform for AFP to Adobe PostScript for z/OS (5655-P21)

It describes the transforms and how to customize them, submit transform jobs, and diagnose errors. Also, it describes how to migrate from Infoprint Server Transforms V1.1.

Integrated Security Services

This section describes documents for the Integrated Security Services, including Enterprise Identity Mapping, Network Authentication Service, and Open Cryptographic Services Facility.

Integrated Security Services Enterprise Identity Mapping (EIM) Guide and Reference
SA22-7875
This document contains information about using Enterprise Identity Mapping (EIM). EIM is an architecture that serves as a security technology to make it easier to manage users in a cross-platform environment.

z/OS Integrated Security Services Network Authentication Service Administration
SC24-5926
Provides an introduction to the z/OS implementation of Kerberos Version 5 from MIT, as well as configuration and administration information, including the few administration commands needed. It also includes status codes and messages.

z/OS Integrated Security Services Network Authentication Service Programming
SC24-5927
Contains all of the application programming interfaces (APIs): Kerberos, GSS-API, and GSS-API with Kerberos mechanism, for the z/OS implementation of Kerberos Version 5 from MIT.

z/OS Integrated Security Services Open Cryptographic Enhanced Plug-ins Application Programming
SC24-5925
Describes the OCEP service provider modules and how they are intended to be used with the framework provided by the Open Cryptographic Services Facility (OCSF). It also describes how these service provider modules enable daemon applications to use RACF to provide security functions relating to digital certificates.
This section describes documents for ISPF.

**z/OS ISPF Dialog Developer's Guide and Reference**  
**SC34-4821**  
Describes how to use the ISPF Dialog Manager component. Explains how  
to create ISPF panels using Dialog Tag Language (DTL), control ISPF  
sessions, use ISPF facilities and services, and define ISPF panel messages  
and file tailoring skeletons.

**z/OS ISPF Dialog Tag Language Guide and Reference**  
**SC34-4824**  
Explains how to use the Dialog Tag Language (DTL) to design and create  
ISPF dialogs containing elements such as application panels, help panels,  
variables, fields, messages, command tables and key lists. It also includes  
an alphabetical reference guide to DTL tags.

**z/OS ISPF Edit and Edit Macros**  
**SC34-4820**  
Explains how to use the ISPF editor and how to use, write and test edit  
macros. Includes an alphabetical reference guide to edit line, primary, and  
macro commands available for ISPF.

**z/OS ISPF Messages and Codes**  
**SC34-4815**  
Provides information for ISPF users about error messages and codes  
issued by ISPF, PDF, and SCLM.

**z/OS ISPF Planning and Customizing**  
**GC34-4814**  
Provides planning information and procedures.

**z/OS ISPF Reference Summary**  
**SC34-4816**  
Provides a quick reference for application developers and library  
administrators to ISPF services and variables, edit macro commands,  
SCLM services and macros, and DTL tags.

**z/OS ISPF Services Guide**  
**SC34-4819**  
Describes how to use ISPF Dialog Management services and PDF Services  
to develop dialogs, including information about each service such as syntax,  
return codes, and examples.

**z/OS ISPF Software Configuration and Library Manager Guide and Reference**  
**SC34-4817**  
Describes how to set up and maintain an SCLM project environment, and  
how programmers can use SCLM functions to control development projects.

**z/OS ISPF User's Guide Vol I**  
**SC34-4822**  
Describes the ISPF user interface and introduces ISPF concepts and  
functions including commands, libraries, and data sets.
SC34-4823  Provides detailed reference and usage information about using ISPF options 0 to 10 and the SuperC and Search-For data set utilities.

### JES

This section describes documents that are shared between JES2 and JES3.

- **z/OS JES3 Commands**
  - **SA22-7540**
    - This document describes the application programming of JES2 and JES3.
    - This document provides the information that you need to:
      - Use the Spool Data Set Browse.
      - Use the Server/Client Print Interface.
      - Use the Internal Reader.
      - Use the IBM-supplied External Writer.

### JES2

This section describes documents for JES2.

- **z/OS JES2 Commands**
  - **SA22-7526**
    - Provides the system console operator and system programmer with the information required to control JES2. The document presents task-oriented material required to use JES2 commands to perform various tasks and a reference section that presents all JES2 commands in alphabetic order.

- **z/OS JES2 Diagnosis**
  - **GA22-7531**
    - Describes the use of JES2 diagnostic aids and tools and how to interpret the output of those aids and tools. The document helps the system programmer to identify a problem, collect information about the problem, report the problem to IBM, and fix the problem.

- **z/OS JES2 Initialization and Tuning Guide**
  - **SA22-7532**
    - Describes the general functions of JES2 and provides information about JES2 initialization, JES2 processing, network job entry (NJE), remote job entry (RJE), and factors affecting performance.
    - Its companion document, **z/OS JES2 Initialization and Tuning Reference** describes the JES2 initialization statements in detail.

- **z/OS JES2 Initialization and Tuning Reference**
  - **SA22-7533**
    - Describes the JES2 initialization statements and their parameters and provides summary or overview charts of the statements.

- **z/OS JES2 Installation Exits**
  - **SA22-7534**
    - Provides system programming information about the use of IBM-defined and installation-defined JES2 exit routines. It describes how to establish JES2 exit routines to tailor JES2 without source code modification.
JES2

**z/OS JES2 Introduction**
SA22-7535
Provides a high-level overview of JES2, its functions, and its relationship to other MVS components. It also provides an overview of JES2 initialization, operation, and customization and diagnostic techniques.

**z/OS JES2 Macros**
SA22-7536
Provides information about the use and syntax of JES2 executable macro instructions.

**z/OS JES2 Messages**
SA22-7537
Describes JES2 messages and suggests appropriate operator, system programmer, and application programmer responses.

JES3

This section describes documents for JES3.

**z/OS JES3 Commands**
SA22-7540
Describes the commands used to operate JES3 and provides system operators and system programmers with the information required to control JES3. This document contains task-oriented material required to use JES3 commands to perform various tasks and a reference section in which all JES3 commands are presented in alphabetic order.

**z/OS JES3 Customization**
SA22-7542
Provides information on customizing JES3 through the use of dynamic support programs (DSPs) and installation exits. The document explains how to write a DSP and an installation exit routine and describes the JES3 macros available.

**z/OS JES3 Diagnosis**
GA22-7547
Provides information on tools for diagnosing JES3 and user-written extensions of JES3.

**z/OS JES3 Diagnosis Reference**
GA22-7548
Contains interactive problem control system (IPCS) information pertinent to JES3, control block chaining, module tables, and mapping macro tables.

**z/OS JES3 Initialization and Tuning Guide**
SA22-7549
Provides guidance information required to install, initialize, customize, and tune JES3.

**z/OS JES3 Initialization and Tuning Reference**
SA22-7550
Provides reference information required to install, initialize, customize, and tune JES3.

**z/OS JES3 Introduction**
SA22-7551
Provides overview information about JES3 including the various processor and device combinations under which JES3 operates. This document also describes JES3 features of interest to an operator, an application programmer, and a system programmer.

z/OS JES3 Messages
SA22-7552
Describes JES3 messages and suggests appropriate operator, system programmer, and application programmer responses.

Language Environment
This section describes documents for Language Environment®.

z/OS Language Environment Concepts Guide
SA22-7567
Introduces Language Environment architecture, a system of constructs and interfaces that provides a common run-time environment and run-time services for all Language Environment-conforming programming language products (those products that adhere to Language Environment's common interface).

z/OS Language Environment Customization
SA22-7564
Explains how to customize and maintain Language Environment for z/OS.

z/OS Language Environment Debugging Guide
GA22-7560
Explains how to debug applications that run with Language Environment, get details on run-time messages, and diagnose problems with Language Environment. Provides assistance with detecting and locating programming errors that occur during run time under Language Environment. It can help you establish a debugging process to analyze data and narrow the scope and location of where an error might have occurred. You can read about how to prepare a routine for debugging, how to classify errors, and how to use the debugging facilities Language Environment provides. Also included are chapters on debugging HLL-specific routines and routines that run under CICS.

z/OS Language Environment Programming Guide
SA22-7561
Describes how to:
- Prelink, link, and run (under MVS, TSO/E, or z/OS UNIX System Services) single-language applications written in IBM C, C++, COBOL, PL/I, Fortran, and assembler.
- Effectively use Language Environment callable services and run-time options.
- Understand and use Language Environment initialization and termination, program management, storage management, condition handling, NLS, Date/Time, and locale support.

z/OS Language Environment Programming Guide for 64-bit Virtual Addressing Mode
Language Environment

SA22-7569
Describes how to:
- Prelink, link, and run single-language applications using 64-bit virtual addressing mode and written in IBM C, C++, and assembler.
- Effectively use Language Environment callable services and run-time options for 64-bit addressing.
- Understand and use Language Environment initialization and termination, program management, storage management, condition handling, NLS, Date/Time, and locale support.

z/OS Language Environment Programming Reference
SA22-7562
Provides application programmers with a detailed description of each Language Environment run-time option and callable service, as well as information on how to use them. It also provides programming examples that illustrate how each callable service can be used in routines written in Language Environment-conforming high-level languages (HLLs) and assembler language.

z/OS Language Environment Run-Time Messages
SA22-7566
Contains run-time messages and return codes for Language Environment and supported high-level languages, including C/C++, Fortran, PL/I, VisualAge® PL/I, and COBOL.

z/OS Language Environment Run-Time Application Migration Guide
GA22-7565
Provides an overview of the steps required to migrate applications for use with Language Environment. This document is designed to help you create a broad migration strategy. This document will help you identify which modules can be migrated first, and which will require relinking or recompiling. It also explains how to use Language Environment run-time options to achieve behavior that is compatible with your old modules.

The following run-time migration guides for specific languages are also provided in softcopy on the z/OS Collection.
- Enterprise COBOL for z/OS, V4R2, Compiler and Runtime Migration Guide (GC23-8527)
- z/OS XL C/C++ Compiler and Run-Time Migration Guide for the Application Programmer (GC09-4913)
- Enterprise COBOL for z/OS, V4R2, Programming Guide (GC27-1409)
- Enterprise PL/I for z/OS, V3R9, Migration Guide (GC27-1458)
- VisualAge PL/I for OS/390 Compiler and Run-Time Migration Guide (SC26-9474)
- PL/I for MVS & VM Compiler and Run-Time Migration Guide (SC26-3118)
- Language Environment for MVS & VM Fortran Run-Time Migration Guide (SC26-8499)

z/OS Language Environment Writing Interlanguage Communication Applications
SA22-7563
Describes how to create and run applications that contain interlanguage communication with Language Environment.
Language Environment

**z/OS Language Environment Vendor Interfaces**
SA22-7568
Documents the set of low-level interfaces, or compiler-writer interfaces (CWIs), that can be used between the common run-time component and C, C++, COBOL, Fortran, PL/I, VisualAge PL/I, and other member run-time components of Language Environment.

### Library Server

This section describes documents for Library Server, previously known as BookManager BookServer.

**z/OS IBM BookManager BookServer for World Wide Web: Getting Started**
SC31-8814
Describes the features of the BookManager BookServer product for Web servers. It provides information for both administrators and users. With IBM BookManager BookServer, administrators can create a library of BookManager electronic documents and make it available on the Internet. Users can read and search for information in these electronic documents using any Web browser such as Netscape.

**Library Server: Getting Started**
SC31-6376
Describes the z/OS Library Server and how to use and configure the z/OS LibraryCenter.

### Metal C Runtime Library

This section describes the document that supports Metal C Runtime Library.

**z/OS Metal C Programming Guide and Reference**
SC33-7997
Provides instructions for users of the z/OS or z/OS.e C/C++ compiler who are using the Metal C compiler option. It contains an introduction, descriptions of C functions and header files, an appendix on stack requirements. It also contains advanced guidelines and information for developing C and C++ programs to run on the z/OS or z/OS.e operating systems.

### MVS

This section describes documents for MVS (Base Control Program).

**z/OS Batch Runtime Planning and User's Guide**
SA23-2270
Describes COBOL and Java interoperability and explains how your installation can: Convert existing COBOL applications to Java Enhance COBOL code with Java methods Share access to DB2.

**z/OS Capacity Provisioning**
SC33-8299
Describes capacity planning on z/OS.

**z/OS MVS Device Validation Support**
SA22-7586
Describes the requirements for I/O devices that are not supported.
MVS

z/OS MVS Diagnosis: Reference
GA22-7588
Provides system reference material needed for diagnosing system problems. It describes the problem data that is available in dumps and traces and also explains how to request and format that data.

z/OS MVS Diagnosis: Tools and Service Aids
GA22-7589
Describes how to use IBM tools (such as dumps and traces) and service aid programs (LIST and SPZAP) to diagnose and fix problems in system and application programs.

z/OS MVS Dump Output Messages
SA22-7590
Provides a single dump message reference for the interactive problem control system (IPCS), the MVS components that provide IPCS formatters, and TSO/E.

z/OS MVS Initialization and Tuning Guide
SA22-7591
Contains information about tasks related to MVS initialization, with a major focus on the use of SYS1.PARMLIB to manage system resources. Its companion document, z/OS MVS Initialization and Tuning Reference, describes the members of SYS1.PARMLIB in detail.

z/OS MVS Initialization and Tuning Reference
SA22-7592
Describes the function, use, and format of each member of SYS1.PARMLIB. It contains reference information related to many MVS components and to other products.

z/OS MVS Installation Exits
SA22-7593
Describes the installation exits available for modifying the MVS element of z/OS.

z/OS MVS IPCS Commands
SA22-7594
Provides reference information about the IPCS commands, subcommands, and dialog commands. The document describes how to use IPCS and gives examples of subcommand syntax and output generated by the subcommands.

z/OS MVS IPCS Customization
SA22-7595
Provides IPCS programming requirements and explains how to customize access to IPCS and the IPCS dialog. The programmer can use this document when writing IPCS exit routines, using IPCS-shipped CLISTs, and setting IPCS defaults.

z/OS MVS IPCS User's Guide
SA22-7596
Explains how to access IPCS, presents the IPCS full-screen dialog, and provides information about the IPCS subcommands.

z/OS MVS JCL Reference
MVS

SA22-7597
Describes how to code JCL, JES2, and JES3 control statements needed to perform the job control tasks presented in z/OS MVS JCL User's Guide.

z/OS MVS JCL User's Guide
SA22-7598
Describes the job control tasks needed to submit jobs into the operating system, control the system's processing of jobs, and request the resources needed to run jobs. Its companion document, z/OS MVS JCL Reference, provides JCL coding information.

z/OS MVS Planning: APPC/MVS Management
SA22-7599
Presents an overall picture of APPC/MVS as it relates to the rest of MVS, Systems Application Architecture®, and APPC, to help integrate APPC/MVS into existing configurations.

z/OS MVS Planning: Global Resource Serialization
SA22-7600
Describes how to plan, install, operate, and tune a global resource serialization complex.

z/OS MVS Planning: Operations
SA22-7601
Provides the information that a system programmer needs to understand how to plan MVS operations. Its primary focus is on how to plan an MVS console configuration.

z/OS MVS Planning: Workload Management
SA22-7602
Describes workload management concepts and interfaces. It includes the steps required for using workload management and the benefits of using it.

z/OS MVS Product Management
SA22-7603
Explains two usage pricing methods: S/390® Usage Pricing and Measured Usage License Charges. Also explains S/390 dynamic enablement externals for a product administrator. The document describes the data analysis utility covering both data collecting and reporting. It also describes how to change the enablement policy and provides information about the enablement report.

z/OS MVS Program Management: Advanced Facilities
SA22-7644
Describes the programming interfaces provided by the program management component of z/OS. It describes the Binder Application Programming Interface, macros, user exits, and buffer formats.

z/OS MVS Program Management: User's Guide and Reference
SA22-7643
Describes the end user interfaces provided by the program management component of z/OS. It contains an overview of the components, describes how to create executable programs from source modules, use the program management binder (starting, defining input, editing data, options, control statements), the linkage editor, and the batch loader.
Describes how to use MVS services for unauthorized assembler language programs. This document also contains guidelines and suggested coding practices for coding in 31-bit addressing mode and for modifying programs that use 24-bit addressing mode to use 31-bit addressing mode. If you are relatively new to assembler language programming for MVS, this document is a good place to start.

Its companion documents, z/OS MVS Programming: Assembler Services Reference ABE-HSP and z/OS MVS Programming: Assembler Services Reference IAR-XCT, describe coding the macros that invoke these MVS services.

These volumes describe how to code the macros and callable services that invoke the services of MVS. These macros and callable services are available to all assembler language programs.

Describes how to use MVS services for authorized assembler language programs. Its companion documents, z/OS MVS Programming: Authorized Assembler Services Reference, Volumes 1–4, describe coding the macros that invoke these services.

Describe how to code the macros and callable services that are available only to authorized assembler language programs.

Describes the callable services available to the programmer coding in a high-level language such as COBOL, FORTRAN, C, Pascal, and PL/1. These services are also available to assembler language programmers.
SA22-7614
Describes how to use cross memory services and extended addressability techniques, such as data spaces and hiperspaces to extend the virtual storage available to programs.

z/OS MVS Programming: JES Common Coupling Services
SA22-7615
Provides MVS and JES system programmers with both guidance and reference information on how to use the JES common coupling services assembler macros and installation exits to affect JES communication processing in a sysplex environment.

z/OS MVS Programming: Product Registration
SA22-7604
Provides guidance and reference information for the registration callable services, which are used to register an element or prepare an optional feature for dynamic enablement.

z/OS MVS Programming: Resource Recovery
SA22-7616
Describes how to use recoverable resource management services (RRMS) in a resource manager that provides access to protected resources. Resource recovery services (RRS), a system component, is the sync-point manager. While this document is primarily for experienced programmers, it also describes managing RRS at an installation, including information about using system logger with RRS and running RRS.

z/OS MVS Programming: Sysplex Services Guide
SA22-7617
Describes how to use the sysplex services available to assembler language programs that participate in a sysplex, communicate with other members of a sysplex, benefit from automatic restarts, and share data using the coupling facility.

z/OS MVS Programming: Sysplex Services Reference
SA22-7618
Describes how to code sysplex services for assembler language programs that participate in a sysplex, communicate with other members of a sysplex, benefit from automatic restarts, and share data using the coupling facility.

z/OS MVS Programming: Workload Management Services
SA22-7619
Describes the services intended for use by subsystem work managers and performance monitoring products.

z/OS MVS Programming: Writing Servers for APPC/MVS
SA22-7620
Provides the information that an application developer needs to write servers for use in an APPC/MVS environment.

z/OS MVS Programming: Writing Transaction Programs for APPC/MVS
SA22-7621
Provides the information that an application programmer needs to write APPC transaction programs for use on MVS.

z/OS MVS Programming: Writing Transaction Schedulers for APPC/MVS
MVS

SA22-7622
Provides the information that an application programmer or system programmer needs to write transaction schedulers other than the one provided by APPC/MVS.

z/OS MVS Setting Up a Sysplex
SA22-7625
Provides the information that a system programmer needs to plan, install, and tune MVS systems in a sysplex. It includes information about the policies available for managing a sysplex as well as information about the coupling facility.

z/OS Unicode Services User’s Guide and Reference
SA22-7649
This manual provides information for setting up and using the z/OS Support for the Unicode product. The manual also includes a complete list of the IBM-supplied conversion tables.

z/OS MVS System Codes
SA22-7626
Describes system completion and wait state codes.

z/OS MVS System Commands
SA22-7627
Describes the system commands available to control an MVS system.

z/OS MVS System Management Facilities (SMF)
SA22-7630
Provides information for system programmers who implement policies and procedures to account for data processing costs. This task includes deciding how to apportion data processing costs to data processing users and using SMF record data to obtain the required information about the use of system resources.

z/OS MVS System Messages, Volumes 1–10
SA22-7631
z/OS MVS System Messages, Vol 1 (ABA-AOM)
SA22-7632
z/OS MVS System Messages, Vol 2 (ARC-ASA)
SA22-7633
z/OS MVS System Messages, Vol 3 (ASB-BPX)
SA22-7634
z/OS MVS System Messages, Vol 4 (CBD-DMO)
SA22-7635
z/OS MVS System Messages, Vol 5 (EDG-GFS)
SA22-7636
z/OS MVS System Messages, Vol 6 (GOS-IEA)
SA22-7637
z/OS MVS System Messages, Vol 7 (IEB-IEE)
SA22-7638
z/OS MVS System Messages, Vol 8 (IEF-IGD)
SA22-7639
z/OS MVS System Messages, Vol 9 (IGF-IWM)
SA22-7640
z/OS MVS System Messages, Vol 10 (IXC-IZP)
Describe the messages issued by MVS and other z/OS elements, and suggests appropriate operator, system programmer, and application programmer responses.

**z/OS MVS Using the Functional Subsystem Interface**
SA22-7641
Describes the functional subsystem interface (FSI) and shows how a functional subsystem (FSS) and a job entry subsystem (JES) communicate using the FSI.

**z/OS MVS Using the Subsystem Interface**
SA22-7642
Provides information needed both to write a subsystem and to invoke subsystem services. This document describes the subsystem interface (SSI) and provides detailed, uniform descriptions of the subsystem interface function codes and examples that help users understand them.

---

### Network File System

This section describes documents for Network File System.

**z/OS Network File System Guide and Reference**
SC26-7417
This book is a combination of three earlier z/OS NFS books. It describes techniques for:
- accessing and creating MVS data sets from a client environment using the NFS protocol
- customizing and operating the z/OS Network File System server
- diagnosing and tuning NFS on z/OS.

---

### Open Systems Adapter Support Facility

This section describes documents for the Open Systems Adapter Support Facility.

**zEnterprise 196, System z10, System z9 and eServer zSeries OSA-Express Customer’s Guide and Reference**
SA22-7935
Describes how to define and use the Open Systems Adapter-Express feature and the Open Systems Adapter Support Facility (OSA/SF) for zSeries processors. An OSA-Express is an integrated zSeries hardware feature that combines the functions of an I/O channel with the functions of a network port to provide direct connectivity between eServer applications and their clients on the attached network.

**z900: OSA-2 Planning Guide**
GA22-7477
Describes how to install and use the Open Systems Adapter-2 feature and the Open Systems Adapter Support Facility (OSA/SF).

**OSA-ICC User’s Guide**
SA22-7990
Describes how to use the Open Systems Adapter Integrated Controller.
Parallel Sysplex

This section describes documents for Parallel Sysplex®. For help setting up a Parallel Sysplex, see z/OS Parallel Sysplex Customization Wizard at:

http://www.ibm.com/systems/z/os/zos/wizards/

z/OS Parallel Sysplex Application Migration
SA22-7662
Contains planning considerations for the parallel processing of applications that run on Customer Information Control System (CICS)/ESA and Information Management System (IMS)/ESA.

z/OS Parallel Sysplex Overview
SA22-7661
Provides an overview of the sysplex and coupling facility data sharing. It describes basic concepts and the value of the sysplex to your business.

Resource Measurement Facility (RMF)

This section describes documents for Resource Measurement Facility.

z/OS RMF Messages and Codes
SC33-7993
Explains messages.

z/OS RMF NewsFLASH
SC33-7995
Provides most current information about RMF™ and RMF-related tools.

z/OS RMF Performance Management Guide
SC33-7992
Describes how to optimize performance management.

z/OS RMF Programmer's Guide
SC33-7994
Describes Resource Measurement Facility programming interfaces.

z/OS RMF Reference Summary
SX33-9033
Describes all Resource Measurement Facility commands and options.

z/OS RMF Report Analysis
SC33-7991
Describes the content of all Resource Measurement Facility reports.

z/OS RMF User's Guide
SC33-7990
Describes all relevant tasks belonging to performance management.

REXX Alternate Library

This section describes the documents for REXX Alternate Library.

IBM Compiler and Library for REXX on System z: User's Guide and Reference
REXX Alternate Library

SH19-8160
Describes how to compile and run programs written in the Restructured EXtended eXecutor (REXX) language. It describes how to use the:
• IBM Compiler for REXX on zSeries (referred to as the Compiler)
• IBM Library for REXX on zSeries (referred to as the Library)

IBM Compiler and Library for REXX on System z: Diagnosis Guide
SH19-8179
Provides information to help system programmers and IBM service personnel to diagnose problems encountered when using the:
• IBM Compiler for REXX on zSeries (referred to as the Compiler)
• IBM Library for REXX on zSeries (referred to as the Library)

Run-Time Library Extensions

This section describes documents for the C/C++ Compiler feature. For related books of the z/OS C/C++ Compiler features, see "XL C/C++ Compiler" on page 48.

z/OS Common Debug Architecture User’s Guide
SC09-7653
Common Debug Architecture User’s Guide introduces the user to Common Debug Architecture (CDA). It first provides a high-level overview of CDA. The document then illustrates how to use the CDA libraries and utilities, through explanations and examples. Finally, it shows an example implementation, using the utilities that are shipped with CDA.

z/OS Common Debug Architecture Library Reference
SC09-7654
Common Debug Architecture Library Reference is the reference for the Common Debug Architecture (CDA) library, libddpi. It provides a brief overview of CDA, but the majority of the document is a detailed description of every API and type. CDA is written in the C programming language. CDA is based on ELF application binary interfaces (ABIs) and the DWARF format.

DWARF/ELF Extensions Library Reference
SC09-7655
DWARF/ELF Extensions Library Reference is intended for programmers who will be developing program-analysis applications and debugging applications for the IBM C/C++ compiler on the z/OS operating system. These applications will create or query information from ELF objects and DWARF debugging information on the z/OS operating system.

SDSF

This section describes the document for SDSF.

z/OS SDSF Operation and Customization
SA22-7670
Describes ISFPARMS, security, operation of the SDSF server, and problem determination, including messages and codes.

For help in configuration that is required for sysplex support on device and browse panels, see the z/OS SDSF Customization Wizard at http://www.ibm.com/systems/z/os/zos/wizards/
Security Server

This section describes documents for the z/OS Security Server (RACF).

**z/OS Security Server RACROUTE Macro Reference**
SA22-7692
Describes the RACF system macros and explains how to code the interfaces.

**z/OS Security Server RACF Auditor's Guide**
SA22-7684
Describes auditing considerations as well as how to use the SMF data unload facility, the RACF report writer, and the data security monitor.

**z/OS Security Server RACF Callable Services**
SA22-7691
Describes the RACF callable services and explains how to code the interfaces.

**z/OS Security Server RACF Command Language Reference**
SA22-7687
Contains the functions and syntax of all the RACF commands.

**z/OS Security Server RACF Data Areas**
GA22-7680
Contains descriptions of the data areas used by RACF.

**z/OS Security Server RACF Diagnosis Guide**
GA22-7689
Explains how to diagnose problems in RACF.

**z/OS Security Server RACF Macros and Interfaces**
SA22-7682
Describes each product macro and its syntax and explains how to code the interfaces.

**z/OS Security Server RACF Messages and Codes**
SA22-7686
Contains the RACF messages, routing and descriptor codes, RACF manager return codes, and RACF-related system completion codes.

**z/OS Security Server RACF Security Administrator's Guide**
SA22-7683
Explains RACF concepts and describes how to plan for and implement RACF.

**z/OS Security Server RACF System Programmer's Guide**
SA22-7681
Describes how to modify and maintain RACF.

**z/OS Security Server RACF General User's Guide**
SA22-7685
Explains how general users can perform basic security tasks with RACF, such as protecting data sets and general resources.
SMP/E

This section describes documents for SMP/E.

**SMP/E Commands**
**SA22-7771**
Contains detailed information about the syntax and processing of SMP/E commands and associated reports.

**SMP/E Messages, Codes, and Diagnosis**
**GA22-7770**
Explains how to handle and diagnose suspected SMP/E problems. Lists the messages issued by SMP/E, explains why they may be issued, and tells how to respond to them. It also lists the return codes that may be issued for each SMP/E command, explains what they mean and how to respond to them, and provides error recovery procedures for each command.

**SMP/E Reference**
**SA22-7772**
Contains detailed information about the syntax and processing of SMP/E MCS statements. Also describes the data sets required by SMP/E commands, explains the contents of the entries used by SMP/E to manage the system, and explains the output produced by SMP/E. It explains how to use the SMP/E user exit routines and service routines, provides information on how to tailor SMP/E processing, and documents the intended programming interfaces.

**SMP/E User's Guide**
**SA22-7773**
Describes how to use SMP/E. It contains an overview of SMP/E and the data sets it uses, describes how to install software, and explains how to use SMP/E to manage the system.

TSO/E

This section describes documents for TSO/E.

**z/OS TSO/E Administration**
**SA22-7780**
Describes ways to define users to TSO/E through the ACCOUNT command and through the Information Center Facility services. It also provides detailed information about maintaining the Information Center Facility services.

**z/OS TSO/E CLISTs**
**SA22-7781**
Contains information about creating, structuring, and executing CLISTs.

**z/OS TSO/E Command Reference**
**SA22-7782**
Contains syntax information for non-authorized TSO/E commands and Session Manager tasks. Authorized commands are described in **z/OS TSO/E System Programming Command Reference**.

**z/OS TSO/E Customization**
Contains the information necessary to customize and maintain a TSO/E system.

Contains an overview of the TSO/E element of z/OS. It explains the purpose and benefits of TSO/E, the functions and tools available to end users and programmers, and introduces the customization, administration, and diagnosis aspects of TSO/E.

Explains how to write a server to receive a service request, process the request, and return a reply to the requester. The document includes a sample server, along with information about installing, testing, and debugging servers for use with the TSO/E Enhanced Connectivity Facility.

Contains descriptions and the detecting module for TSO/E messages that are displayed on the screen, and MVSSERV messages that are written to a trace data set.

Explains simple concepts and leads new users through basic TSO/E tasks, such as logon, use of panels and data sets, and sending and receiving information. It shows them how to use the Information Center Facility, issue line mode TSO/E commands, and access ISPF/PDF.

Explains how to write application programs that run under TSO/E, such as CLISTs, REXX execs, command processors, servers, and callable programs.

Describes TSO/E services including the parse service routine, I/O service routines, space management service, table look-up service, printer support CLISTs, and the TSO/E environment service. It also explains how to access the Information Center Facility names directory from an application program.

Describes the structure and general syntax of the REXX language including expressions and operators, clauses, and assignments and symbols.

Explains how to design, write, and run REXX execs.
Contains mappings of data areas that are used by two or more components or programming interfaces, or are needed for debugging and diagnosis. It provides information for debugging installation-provided programs or diagnosing IBM-provided programs.

Describes authorized TSO/E commands including ACCOUNT, CONSOLE, CONSPROF, OPERATOR, and PARMLIB.

Reinforces basic concepts introduced in z/OS TSO/E Primer and gives additional details. It also describes more complex tasks such as preparing and running programs in the foreground or background, customizing the terminal session, and using Session Manager.

This section describes documents for:
- z/OS UNIX System Services Shells, Utilities, and Debugger
- z/OS UNIX System Services Parallel Environment
- z/OS UNIX System Services Connection Manager
- z/OS UNIX System Services Process Manager

If you are installing and customizing z/OS UNIX System Services for the first time, see the z/OS UNIX Customization Wizard at:
http://www.ibm.com/systems/z/os/zos/wizards/

Provides information that is needed to use a z/OS system with the shell and utilities feature as well as TSO/E commands for using z/OS UNIX.

Provides information about the installation, programming interfaces, and problem determination tools available for the Connection Manager and Process Manager components of z/OS UNIX System Services.

Provides details for coding to the z/OS UNIX System Services file system interface.

Explains the messages, return, and reason codes that occur in the z/OS UNIX shells or debugger.

Lists the subroutines a programmer can use when writing parallel applications, along with the associated parameters and syntax.
z/OS UNIX System Services

**z/OS UNIX System Services Parallel Environment: Operation and Use**
SA22-7810
Provides information for end users and application developers on how to compile, run, and analyze parallel programs.

**z/OS UNIX System Services Planning**
GA22-7800
Contains information needed to plan for the use of UNIX System Services in a z/OS environment.

**z/OS UNIX System Services Programming: Assembler Callable Services Reference**
SA22-7803
Describes z/OS UNIX callable services.

**z/OS UNIX System Services Programming Tools**
SA22-7805
Describes advanced application programming tools, such as make and dbx.

**z/OS UNIX System Services User's Guide**
SA22-7801
Describes how to use the z/OS UNIX shells and file system.

**z/OS Using REXX and z/OS UNIX System Services**
SA22-7806
Describes how to use the REXX programming language to access z/OS UNIX System Services.

---

XL C/C++ Compiler

This section describes documents for the XL C/C++ Compiler feature. For related books of the Run-Time Library Extensions element of z/OS, see "Run-Time Library Extensions" on page 43.

**z/OS XL C/C++ Language Reference**
SC09-4815
Provides reference information for the C and C++ programming languages as implemented in the z/OS C/C++ compilers.

**z/OS C Curses**
SA22-7820
Describes programming for the screen management orders known as curses.

**z/OS XL C/C++ Compiler and Run-Time Migration Guide for the Application Programmer**
GC09-4913
Provides information for programmers who are migrating to the z/OS C/C++ compiler and the Language Environment run-time library. It discusses migration from the C/370™, AD/Cycle® C/370, C/C++ for MVS/ESA, and previous z/OS C/C++ compilers; the C/370 libraries; and previous releases of Language Environment.

**Standard C++ Library Reference**
SC09-4949
This document provides a technical reference on the details of the Standard C++ Library.
XL C/C++ Compiler

**z/OS XL C/C++ Messages**

GC09-4819

Describes C/C++ messages and suggests appropriate operator, system programmer, and application programmer responses.

**z/OS XL C/C++ Programming Guide**

SC09-4765

Provides guidance on how to write C/C++ programs for the z/OS C/C++ compiler and the C/C++ run-time library component of z/OS Language Environment.

**z/OS XL C/C++ Run-Time Library Reference**

SA22-7821

Contains information for all z/OS C/C++ library functions (except for z/OS C Curses).

**z/OS XL C/C++ User’s Guide**

SC09-4767

Describes the processes of compiling, IPA linking, binding, prelinking and linking, and running both z/OS C and z/OS C++ programs. This document includes information on compiler options, listings, z/OS C/C++ utilities, compiler messages, and program diagnosis.
Chapter 3. z/OS document order numbers

The following table contains the order numbers for z/OS documents for each release.

The Title column contains the full title of the document. The Release column contains the form number applicable to that release. For information about how to order hardcopy documents, see Chapter 1, “Accessing, viewing, and printing z/OS documentation,” on page 1.

The majority of z/OS documents are available in PDF and BookManager format on the z/OS Version 1 Release 13 Collection, on the Internet, and in the z/OS Information Center. The * indicates that this book is available in hardcopy only and is not on the z/OS Collection. Generally, most documents are not orderable in hardcopy; however, the notation HC next to a title indicates that the document can be ordered for a fee in hardcopy. The notation Web next to a title indicates that the document is available only on the Internet, in PDF and BookManager format. The document is not on the z/OS Version 1 Release 13 Collection, nor is it orderable in hardcopy.

Each time a document is refreshed, whether in softcopy only or both in hardcopy and softcopy, the suffix (dash) level of the document is increased. This increase means that sometimes you might not be able to order a hardcopy of the latest suffix level of a document (for example, if it was refreshed only in softcopy between z/OS releases). See the document abstract for information about how to obtain softcopy. To order hardcopy, you might need to select a lower suffix level in these cases.

If you are reading this document in PDF or BookManager form, in the same directory or bookshelf with the softcopy documents it refers to, you can open a referenced document in this section by placing the cursor under the highlighted title and pressing Enter.

## Index

### A
- APARs - documentation updates for 10

### B
- BDT 11, 52
- BDT File-to-File 11
- BookManager BookServer 62
- BookManager Build 52
- BookManager Read 52
- BookManagerBUILD 11
- BookManagerREAD 11

### C
- C/C++ 48, 68
- C/C++ compiler feature 48
- Common Information Model 52
- Communications Server 12, 52
- cross-book linking 1
- Cryptographic Services 16, 54

### D
- DCE 55
- DFSMS 17, 55
- DFSMSdfp 19, 56
- DFSMSdss 19, 56
- DFSMSShsm 20, 56
- DFSMSrmr 20, 56
- DFSMSstvs 21, 57
- DFSORT 21, 57
- Distributed File Service 22, 57
- Doc APAR and PTF document description 10
- document descriptions 9
- DVD collection 2

### E
- Encryption Facility 26, 59
- EREP 22, 57

### F
- FFST 22, 57

### G
- GDDM 23, 57
- GDDM-PGF 24, 58

### H
- hardcopy documents 6
- Hardware Configuration Definition 24, 58
- Hardware Configuration Manager 25

### I
- IBM HTTP Server 26, 59
- IBM Tivoli Directory Server 27
- IBM z/OS Management Facility 27
- ICKDSF 28, 59
- Infoprint Server 28, 60
- Integrated Security Services 29, 60
- ISPF 30, 60

### J
- JES2 31, 61
- JES3 31, 32, 61

### L
- Language Environment 33, 61
- Library Server 35, 62
- linking, softcopy 1

### M
- Managed System Infrastructure for Setup 62
- Management Facility 59
- METAL C Runtime 62
- Metal C Runtime Library 35
- MVS 35, 62

### N
- Network File System 41, 65
- Notices 69

### O
- order numbers by release 51
- ordering information 1
- OSA 41, 65

### P
- Parallel Sysplex 42, 65
- printing softcopy 4
- PTFs - documentation updates for 10

### R
- RACF 44
- Resource Measurement Facility 42
- REXX Alternate Library 42, 66
